SUBJECT INDEX

Vol. 113*A*, *Nos.* 1–4

Absorption, 233
Acetylcholine (ACh), 165
Acetylsalicylic acid, 383
Acid rain, 369
Acidosis, 369
Action potential, 185
Active transport, 157, 233
Adaptation, 97
Adrenaline (AD), 165
Adrenergic agonist, 135
Adrenergic innervation, 165
Adult, 255
Aerobic, 39
Aerobic capacity, 25
Aerobic metabolism, 17
Albumen capsule, 287
Ambient Po_2, 107
Amino acid composition, 297
Amino acids, 131, 173. 247
Ammonia, 369, 375
AMP, 247
Amphibia, 369
Amphibian, 307
Anaerobic, 39
Andean mammals, 407
Angiotensin II, 307
Anguilla anguilla, 121
Antidiuretic hormone, 307
Anuran, 343
Aplysia oculifera, 205
Atrium, 165
Attractant, 247
Autoimmune disease, 181
Autonomic control, 135
Avian kidney, 333

β-adrenoceptor, 165
Band-3, 121
Barium, 143
Behaviour, 247
Betaine, 247
Billfish, 3
Bioenergetics, 17
Birds, 97
Blood pressure, 61
Body size, 393
Bohr protons, 83
Bombina orientalis, 393
Boundary layer, 107
Bovine, 275

Ca^{2+} delivery, 77
Calcium, 343
Calcium current, 185
Calcium-dependent, 143
Carbon dioxide excretion, 121
Carbon dioxide, 83, 287
Cardiac output, 61, 77
Carnitine palmitoyl transferase, 69
Chelonia mydas, 293
Chemical digestion, 239
Cholesterol esters, 275
Citrate synthase, 393
Clam spat, 113
Cockroach, 131
Contractility, 77
Coral, 297
Coronary circulation, 61
Cortisol, 51, 323
Crustacea, 361
Crustacean erythrophore, 351
Crustaceans, 301
Crypts, 275
Cutaneous oxygen uptake, 107
Cyprinus carpio, 107
Cytolysis, 301

Daily nitrogen needs, 215
Decalcification, 297
Decapod, 361
Dermis, 107
Desert birds, 333
Detection response, 247
Diet choices, 239
Dietary shifts, 215
Differentiation, 195
Direct development, 343
Dolphin fish, 3
Dorado, 3

Ectothermic, 39
Eel (*Anguilla japonica*), 165
Eicosapentaenoic acid, 279
Electrical field stimulation, 165
Electron microscopy, 279
Embryo, 343, 369
Embryo culture, 287
Endangered species, 293
Endothermic, 39
Energetics, 3
Energy budget, 205
Energy contents, 239
Enterocyte esterification, 279
Enterocyte, 275
Epidermis, 107
Exercise, 51, 83
Exercise training, 69
Experimental infection, 401
Extracellular matrix, 195

Fat cell, 91
Fat mobilization, 401
Fatty acid oxidation, 69
Fatty acids, 113, 275
Female, 255
Fiber vascularization, 25
Fish, 83, 107, 143
Fish locomotion, 33
Free fatty acids, 173
Frog, 343
Frugivory, 215
Fungia fungites, 297

Gambel's quail, 333
Gas–liquid chromatography, 279
GH3 cells, 143
Gill, 361
Glomerular filtration, 333
Glucagon, 173
Glucose, 173, 225, 233, 375
Glycerides, 275
Glycogenesis, 51
Goat, 323
Golden-mantled ground squirrel, 255
Green turtle, 293
Growth, 17, 205
Growth hormone, 91, 315

Haemoglobin, 121
Haldane effect, 83, 121
Hatchability, 287
Heart, 69, 135
Heart rate, 61
Heat stress, 323
Helix aspersa, 185
Hematology, 375
Hemocytes, 301
Hemoglobin affinity, 407
Hemolymph, 131
Hemolymph coagulation, 301
Hepatic triacylglycerol content, 401
Hepatic uptake, 157
Hibernators, 255
High-altitude adaptation, 407
High-altitude carnivores, 407
Hormonal imprinting, 315
Hormone turnover, 267
Hormone utilization, 267
Hypoxia, 83

Immunosuppression, 383
Indomethacin, 383
Inflammation, 181
Inotropic effects, 135
Insect, 131
Insects, 239
Interaction, 83
Intestinal adaptation, 225, 233
Intestinal mucosa, 275
Intubation, 173
In vitro, 107
Ionic flux, 185
Ionic requirements, 351
Ions, 375

Juvenile, 255

Kidney, 97
Lactate, 51
Lactate dehydrogenase, 393
Lactation, 323
L-glucose, 225
Lipid, 195
Lipoproteins, 279
Lung, 97
Lymphatic absorption, 279

Macrobrachium potiuna, 351
Magnesium, 343
Mahimahi, 3
Male, 255
Mammals, 97
Mammary epithelial cells, 195
Marlin, 3
Mechanical digestion, 239
Membrane potential, 351
Metabolic rate, 69, 267
Metabolic substrates, 33
Metabolism, 39
Microalgae diets, 113
Mineral, 343
Mitochondria, 69
Mitochondrial biogenesis, 69
Model, 97
Modulation, 225
Molt stages, 247

Mineral, 343
Mitochondria, 69
Mitochondrial biogenesis, 69
Model, 97
Modulation, 225
Molt stages, 247

Morphology, 195
Motility acquisition, 387
Motility initiation, 387
Mouse pureé, 173
Muscarinic ACh-receptor, 165
Muscarinic agonist, 135
Muscle, 39, 51
Muscle fibre, 91
Muscle growth, 315
Myelin, 181
Myocardium, 77
Myosin heavy chain, 315

Naked ovum, 287
Nematodes, 383
Nerve membrane, 185
Nitrogen balance, 369
Nonesterified fatty acids, 401
Nutrient composition, 239
Nutrients, 215

Oncorhynchus mykiss, 121
Open-probability, 143
Organic matrix, 297
Organs, 97
Osmolality, 323, 375
Osmoregulation, 333
Ouabain, 361
Oxidative pathways, 33
Oxygen, 83
Oxygen consumption, 61, 69, 205
Oxygen debt, 17
Oxygen delivery, 25

Panulirus japonicus, 301
Paracellular absorption, 225
Parasites, 383
Passive absorption, 225, 233
Passive diffusion, 157
PCH, 351
pH, 287
Phospholipids, 275
Phosphorus, 343
Photoperiod, 267
Pig, 91
Plasma, 301, 375
Plasma insulin, 173
Plasma osmolality, 333
Potassium current, 185
Prawns, 247
Pregnancy, 323
Prolactin, 143
Proline, 233
Prostaglandins, 383

Quail, 225, 287

Rainbow trout, 181
Rana nigromaculata, 393
Rana rugosa, 393
Raptors, 173
Rate of force production, 393
Rats, 279
Red blood cell, 121
Red muscle, 25
Red Sea, 205
Renal function, 333
Reptiles, 135
Resource allocation, 205

Salmo salar, 375
Scaling, 97
Scombridae, 17, 39
Scophthalmus maximus, 121
Scyliorhinus canicula, 121
Search response, 247
Secondary compounds, 239
Secondary plant metabolites, 215
Seed-eating birds, 239
Seeds, 239
Self-clamp technique, 185
Seminal constituents, 387
Seminal osmolality, 387
Shark, 387
Sigmodon hispidus, 267
Single-cell stage, 287
Skin, 107
Skipjack tuna, 3
Slow-oxidative muscle, 69
Sodium current, 185
Sodium pump, 361
Sodium transport, 361
Solvent drag, 225
Spare capacity, 225
Species differences, 157
Specific antagonists, 307
Specific dynamic action, 17
Spermatozoa, 387
Sperm storage, 387
Swimming, 3, 39, 61
Swimming energetics, 33
Sylvia atricapilla, 215
Sylvia borin, 215
Symmorphosis, 69
0.95% saline, 173

Tadpole, 369
Take-off velocity, 393
Tannin, 215
T-cell proliferation, 181
TEA, 143
Temperature, 267
Tetanic force, 393
Tetraethylammonium, 351
Tetrodotoxin, 351
Thermal dependence, 293
Thermoregulation, 293
Thick albumen, 287
Thin layer chromatography, 279
Thunnus albacares, 17
Thyroxine (T_4), 267
Tissue deposition rates, 91
Tissue metabolic rate, 293
Toad aorta and skin, 307
Toxicity, 375
Transgenesis, 287
Transglutaminase, 301
Transplantation, 383
Trichinella spiralis, 383
Triiodothyronine (T_3), 267
Trout, 51
Trypanosoma vivax, 401
Tuna, 17, 25, 39, 77
Tunas, 3
Turkey, 315
Turtle, 135

Urea, 369, 375
Urine flow, 323
Uterus fluid, 387

Ventilation, 107
Ventricle, 61
Verapamil, 351
Villus, 275
Voltage-dependent, 143

Water intake, 323
Water pH, 369

Yellowfin tuna, 3
